Connections

- To prevent malfunction and equipment failure, always turn down the volume, and turn off all the units before making any connections.
- Do not use connection cables that contain a built-in resistor.
- Before turning the unit on/off, always be sure to turn the volume down. Even with the volume turned down, you might hear some sound when switching the unit on/off. However, this is normal and does not indicate a malfunction.
- If batteries are installed, the unit will turn off if you disconnect or disconnect the AC adapter from the AC outlet while the unit is turned on, or if you connect or disconnect the AC adapter from the unit. When this occurs, unsaved data may be lost. You must turn off the power before you connect or disconnect the power cord or AC adapter.

Use of Battery

- Battery should be installed or replaced before connecting any other devices. This way, you can prevent malfunction and damage.
- If you handle batteries improperly, you risk explosion and fluid leakage. Make sure that you carefully observe all of the items related to batteries that are listed in “USING THE UNIT SAFELY” and “IMPORTANT NOTES” supplied on a separate sheet.

Changing the Battery

1. Hold down the pedal and remove the thumb screw. Open the pedal.
2. Remove the old battery from the battery housing.
3. Connect the battery to the battery housing, and place the battery inside the battery housing.

Main Specifications

- Power Supply: Alkaline battery (9 V, 6R61 or 6LF22)
- AC adapter (PSA series: sold separately)
- Current Draw: 170 mA
- Dimensions: 170 x 92 x 37 mm (6-3/4 x 3-5/8 x 1-1/2 inches)
- Weight: 450 g (1 lb.)
- Acclerators:
  - Options: (sold separately)
  - Accessories: (not included)
  - Product Code: (for the RC-5)
