Introducing HALO

Control surfaces are getting more compact, but studios still need an ergonomic and client-impressive place to house their gear for screen-based activities such as **video production**, **sound design**, and **editing.**

The industrial design of Argosy's HALO combines form and function into a robust, highly efficient, streamlined design.

> ***"The HALO is incredible - seriously, it's 'Best in Show'! Put me down for one."***
>
> **- Glenn Rosenstein**
> **Producer / Engineer**

Lighter. Faster. Better.

HALO is...
for studio owners and operators that have always wanted to acquire an ARGOSY, but due to space or financial limitations couldn't and previously had to settle for a "less than impressive" solution.

NOW YOU CAN

Compact and beautifully ergonomic, HALO can be accessorized to suit your studio requirements.

Accessories

Personalize your Halo Desk with a host of optional accessories such as integrated IsoAcoustics® near-field monitor stands, custom rack mounted shelves, video monitor arms and large pullout desk / accessory drawer.

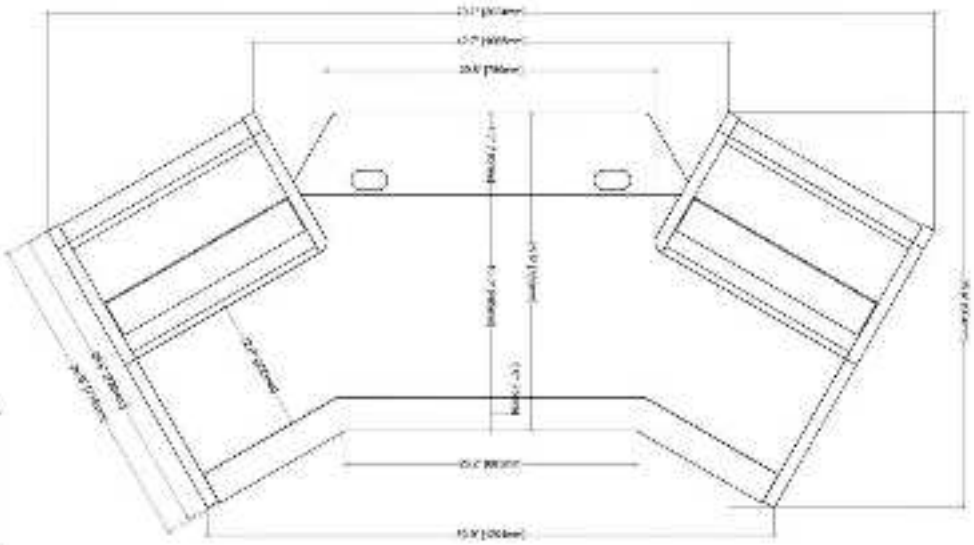

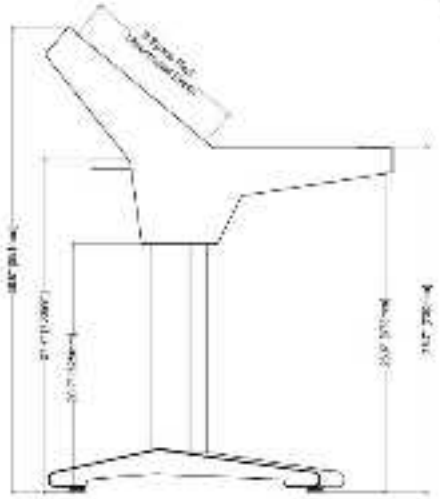

Loaded with standard features to transform any small space into a commanding presence:
