D1

Classic Style Dynamic Microphone

INTRODUCTION

Congratulations on choosing the Golden Age Project D1 microphone!

The D1 is a high quality dynamic microphone with vintage styling and modern acoustic technology. It´s marked presence peak results in a forward and distinctive sound that is very well suited to vocals and many instruments.

The D1 has a cardioid polar pattern which reduces feedback effectively. The ON / OFF switch is very useful for stage / live sound applications and it is totally noise free and can also be securely locked in the ON position to avoid unexpected interruptions in the performance.

The 5/8' thread adator in the stand adaptor matches different stand gauges.

The D1 is a versatile microphone that will perform very well on stage, in the studio or in broadcast applications

FEATURES

- High output dynamic cartrige for a big and powerful sound.
- Classical design and a clear and distinct sound with a presence peak for life-like vocals.
- Cardioid polar pattern that reduces feedback in live use.
- Noise-free locking ON / OFF switch.
- Rugged die cast body

USING THE D1

The D1 can be used with any standard mixer or preamp. Use either a XLR to XLR or XLR to 1/4" plug low impedance cable.

When mounting the D1 to the stand you may need to remove the threaded adapter from the mic holder, depending on the threading of the mic stand.

Be aware of the proximity effect (an increase in bass response) when the mic is close to the sound source). This can be a good or a bad thing. You can adjust the bass response by changing the distance from the mic to the sound source for an optimum result in different applications.

If the microphone is placed close to a speaker during live stage use, feedback may occur. Since the D1 has a cardioid pickup pattern, it will mainly pickup sound coming from the front of the mic. The risk for feedback is therefor greatly reduced.

PRECAUTIONS

- Be careful not to drop the D1 or subject it to shock since this can destroy the sensitive cartridge.
- Store and transport the D1 in it´s padded case.
- Keep the D1 away from extremely high temperatures (60 degrees) and humidity. Do not leave it in direct sunlight.
- When using the D1 outdoors, avoid getting it wet.
- After high-moisture applications such as stage performance, wipe off the D1 with a dry cloth and permit it to air dry. Do not store it in a closed space like a plastic bag until all moisture has evaporated.

WARRANTY

Please check the D1 carefully immediately when you receive it and make sure that there are no problems with the microphone. The warranty period is one year and apply to defects in materials and workmanship. It does not cover misuse of the D1.

If you ever experience any problem with the D1, contact your dealer.

SPECIFICATIONS

Cartridge type: Dynamic

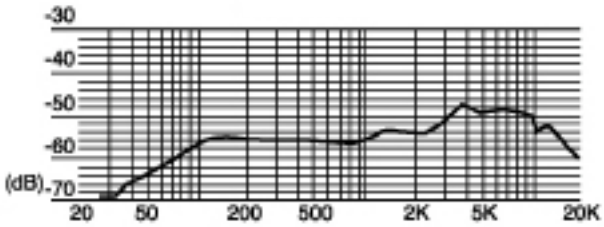

Polar pattern: Cardioid

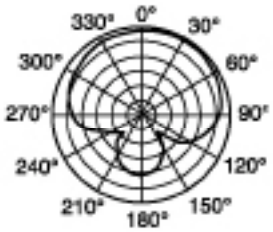

Frequency response: 60Hz - 16kHz

Sensitivity:-54dB (0dB=1V/Pa@1kHz)

Output impedance: 250 ohm

FREQUENCY RESPONSE

Many thanks for purchasing the Golden Age Project D1!

We hope that you will be happy with its performance and that it will give you many hours of troublefree use.
